EVENT TARGETING

WHY EVENT TARGETING?

Targeting the **right people** at the **right place** at the **right time** is the most complex and important aspect of any digital marketing campaign. With American Academy of Anti-Aging Medicine's Event Targeting program we help you **accomplish** all of these. We put your message and brand in front of our conference attendees digitally both **during** and **after** the event.

HOW IT WORKS?

- A4M will capture with a pixel everyone who enters the Convention Center during the event.
- The pixelated users will receive ads during the event as long as they are within 5 miles of the center (this will encompass hotels and restaurants in the area)
- After the show A4M will Cross Device target the pixelated users as they leave and head home.

BENEFITS

- Brand awareness during and after the event
- Highly targeted campaign to conference attendees
- Device agnostic approach (allows messaging to appear on multiple devices)

POSTING GUIDELINES TO YOUR WEBSITE

A few things to start:

1. Please grant analytics@tarsusmediaops.com access to your google analytics. This will help us optimize and report on the campaign.
2. If you use Google Tag Manager please grant 'publish access' to analytics@tarsusmediaops.com. We will load a container that will give us more insight into engagement of the article.

When posting to your website:

3. Please place the following script into the page at the top of the 'body' element, just below the <body> tag.
`<script type="text/javascript" src="https://connecttravel.com/analytics/ga-scroll-track-v2.js"></script>`
This plugin is dependent on being loaded after the jQuery library is loaded, which is typically in the page head.
4. Please use the headline provided for the post.
5. The URL should contain all the words in the headline and should avoid special characters like commas, ampersands, etc. This helps with SEO and enables us to track visits to the page more easily.
6. Make sure to include any hyperlinks linked in the Word document. All links should open in a new tab or window.
7. Add photos and/or videos to the post to help draw readers in and keep them on site for longer. A good rule of thumb is one photo or video for every 250 words.
8. When adding images, use informational keywords about what's in the image in both the image filename and alt text.
9. Include captions and alt text on images.
10. Watch for spacing and weird line breaks in the text once it's posted.
11. Link to the content story somewhere from the website's homepage or another popular landing page for more exposure.

Distribute this content via your owned media outlets including newsletters and social media. Also, encourage any partners mentioned within the copy to also share the content. You also can ask them to post the content on their website, linking back to the original landing page on your website.
